The business analysis officer had a meeting with the management and HR team to confirm the criteria on which employees are evaluated: Technical, Professional, and personal. They also got you the following requirements: Landing page: includes a slider that mentions and describes the criteria with a visual, and a registration/login form The user cannot start the evaluation without being registered and logged in, after login the following will appear: a. A welcoming message: "Welcome first-Name last-Name" b. A drop-down list that includes employees' names c. "Start Evaluation" button to start the evaluation When the button is clicked the evaluation section appears, which includes the following: a. The name of each evaluation criterion b. Under each criterion, there will be at least 3 single-choice questions c. The options for each question are: **Poor, Good, Excellent** d. The "Submit" button, when clicked it saves the evaluation result: Report Page: includes a drop-down list that includes the employees' names (same as the one where you start the evaluation) Once the employee's name is selected their evaluation result will appear as follows: a. Each main criterion will be shown with its questions and the selected option with a color code (**Poor: red, Good: yellow, and Excellent: green**) b. Recommendation section: displays a text area that includes advice to the manager on how to direct the employee to enhance their performance While the user is logged in there will be a "logout" button in the header, when it's clicked it will redirect the user to the landing page **The Mechanism of the website will require you to use local, cookies and session storage, be smart on how, when and where to you use them.**

I am Web development Back End

About Us

Hello! I am Bayan Abu-Alroos. Full-stack Developer Trainee in Orange Academy Coding.

I think in a way I'm kind of like those web pages .

My specialties include quickly learning new programming skills and languages, problem-solving, domain-driven design, responsive design principles, and website optimization .

So far I have C# , .Net , SQL , JavaScript , HTML , CSS , Python , Bootstrap 5 , Php , MySQL, Laravel, React js, WordPress and Git / GitHub under my belt . I'm still enthusiastically grabbing onto any other programming languages, frameworks, or principles I can integrate into the coding web in my head.
